

CARRYING LOADS – SIMPLY.

Table Lifter Rig TLR 1250

- Quick, safe and compact
- Maintenance-free
- Only one person required
- Crane lugs for smooth-running transverse transport
- Electric repositioning of slab tables weighing up to 1250 kg

Table Lifter Rig TLR 1250

Incredibly quick and very easy to use: the PERI Table Lifter Rig TLR 1250 will lower your slab tables weighing up to 1250 kg back to the ground with ease. All lifting and lowering functions are conveniently operated by one person. Both pedestrian stackers and forklifts can be connected to the frame, which makes for ergonomically optimised handling and reduced physical strain for site personnel. As the TLR 1250 does not have its own electronic drive, it can be exposed to a multitude of weather conditions and requires no maintenance.

Efficient

Only one person is needed to move the industrial truck with the PERI Table Lifter Rig quickly and safely.

Load-bearing capacity up to 1250 kg

Operating heights from a minimum of 2.3 m to a maximum of 5.0 m

Suitable for use in combination with various industrial trucks

Versatile

The PERI Table Lifter Rig is compatible with various industrial trucks and can therefore be used in a versatile manner.

PANDION OFFICEHOME Soul | Germany
Ed. Züblin AG, Munich

Maintenance-free

As there are no electronics built into the TLR 1250, the frame can be used maintenance-free and can withstand any weather conditions.

The PANDION OFFICEHOME Soul is a modern office building with space for more than 1,300 workstations across 44,700 sqm² in the 'Werksviertel' district of Munich. The PERI Table Lifter Rig was combined both easily and reliably with the forklift on site in order to lift the VARIODECK Tables. The TLR 1250 could be used in continuous operation, which helped ensure quick and smooth construction progress.
